

SECTION 5

RESIDENTIAL R1 ZONE

5.1 GENERAL PURPOSE OF THE R1 ZONE

The R1 Zone is the most restrictive residential zone, and provides for and regulates single detached dwellings. The zone variations are symbolized by R1 followed by a dash and a number. There is no main Residential R1 Zone variation as the zone is restricted to only single detached dwelling units. The seventeen variations which comprise the zone are differentiated on the basis of site requirements in order to provide for a range of lot sizes and dwelling styles. Zone variations R1-1 to R1-3 deal with existing inner-City smaller lot single dwelling developments; Zone variations R1-4 to R1-9 are zones to be applied to most suburban single dwelling developments; Zone variations R1-10 and R1-11 deal with larger estate lot developments. The R1-12 Zone variation has the lowest lot area standards and is not intended to be applied to large areas; rather, it is intended to be applied to specific areas and reflect existing development on local streets. The approach allows for the supply of a range of lot sizes. The R1-13 Zone variation deals specifically with small lot single detached dwellings in suburban areas of the City. The R1-14, R1-15 and R1-16 Zone variations is intended to apply to large lots with single detached dwellings. A parking regulation (Section 4.19.6) addresses permitted garage and driveway widths.

(Z.-1-051337)

The R1-14, R1-15 and R1-16 Zone variations are generally applied to existing residential lots on individual services in rural areas, typically on lands designated Low Density Residential and Rural Settlement in the Official Plan. The R1-17 Zone variation is typically applied to large existing lots in these rural areas.
