

2022 Development Charges

By-law C.P.-1551-227

What are Development Charges? (DCs)

A fee charged by the City to recover capital costs associated with residential and non-residential growth. Development charges do not pay for operating costs or infrastructure renewal.

Who pays?

The owner of the land that develops or redevelops the land, or any building or structure on the land.

Growth costs are recovered to:

- build new infrastructure supporting growth
- pay down existing debt for past growth works
- avoid taxpayers paying for costs that serve growth

Development charges assist in financing capital projects required to meet the increased need for services resulting from growth and development. They may only be used for the purpose for which they are collected.

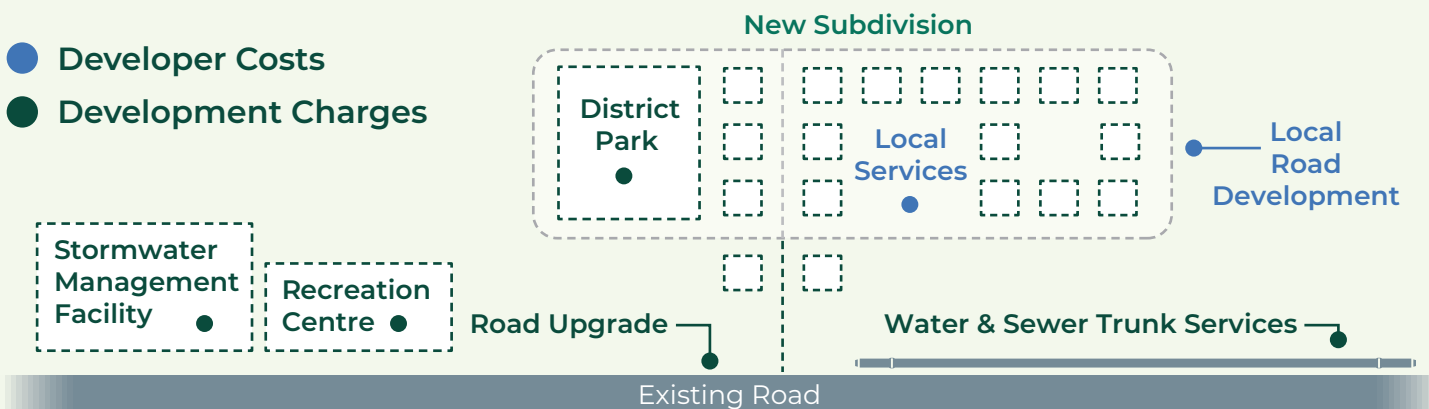

When are DCs calculated and paid?

For development types subject to a Site Plan or Zoning By-law amendment, the DC is calculated the day a complete application is received and is frozen for a period of up to two years. If a building permit has not been issued within the two year frozen period, the DC rate will revert back to the rate in effect on the date the building permit is issued. There are also deferred payment schedules for rental housing, certain institutional and non-profit developments. For all other development types, the DC is calculated and collected on the date a building permit is issued.
