INDUSTRIAL LAND FOR SALE

INNOVATION PARK

Water Service:
The City has installed water lines within the road allowance. London is the only municipality fortunate enough to be supplied by two of the Great Lakes, the world’s largest source of fresh water.

Sanitary Sewers:
The City has installed multiple sanitary private drain connections to the property line. The typical sanitary private drain connection is a 200 mm pipe and invert.

Storm Sewers:
The City has installed multiple storm private drain connections to the property line. No on-site quantity control will be required.

Natural Gas:
Union Gas has existing 4” plastic mains throughout the park.

Electrical Service:
London Hydro has a looped 27.6 kV 4-wire distribution system within Innovation Park that consists of two distribution feeders providing redundancy of supply.
